

SPECIAL SIGNAL "MG" INVOKES THIS SPECIAL INSTRUCTION SHEET

The Coast Guard and salvage contractors are working to recover the sunken oil barge E-4. Salvage efforts have relocated the barge to the position shown. The derrick barge CENTURY has been positioned above the sunken barge. A safety zone of 1000 yard radius from the CENTURY has been established.

The Coast Guard anticipates that the salvage operation will be completed well before our race on June 13th. In the event that the work is delayed and the CENTURY is still at the position shown, the Special Signal "MG" will be displayed before the Warning and the following Special Instruction will apply to classes sailing the long course (because the rhumb line from Race Point nun "2" to Cerberus Shoal Whistle passes through the safety zone):

"MG" -- "Yachts shall not pass between Race Rock Light and Fishers Island."

Note that the Coast Guard will enforce the safety zone.
