Subject: C-class Split by Boat Weight Committee

Enclosed is a listing of the 94 C-class boats that were entered in 1996 Off Soundings, Spring or Fall ( 15 spring only, 62 both, 17 fall only). This is a shopping list from which we could extract boats for a separate light/fast boat class, with the remaining boats collapsed into four classes. The candidate class should have about 19 boats ( 94 - 5 ). I find this resorting of boats to be difficult, as was reported in October.

The displacement-length ratios are very approximate in that both input values are "best guess" in nature. However, it does bring up the question as to what criteria are to be applied if we have a so called light/fast boat class.
