Whaleship "Stanton," Captain Burtch Reported in the Pacific 1823—Reaches New Bedford, April 1824 with 2,000 Bbls. Sperm—Owners Dissatisfied Bring in an Account Against Captain Burtch For $4,000—Left to Arbitration—Joseph R. Anthony's Diaries Record the Facts—Gives Little of Details of the Misunderstanding—Many of the Actions of the Friends Meetings Jotted Down—The Schism Known Later as "Guerneyism," as Opposed to Wilburites" Culminating at Time Diary was Written—Involved John Wilbur of Hopkinton, Outstanding Advocate of the Older Order Of New England Friends.

The Old Dartmouth Historical Society of New Bedford, Mass., prepared and published under its auspices two diaries written in 1823 and up to September, 1824, by Joseph R. Anthony, an accountant in the counting rooms of Rotche's, a whaling and shipping firm of New Bedford, active at that period when the Massachusetts town was a village of some 4,000 souls, with fifteen wharves, eight spermacetti manufacturers, two rope walks and two banks.

• • • • •

An entry as of July 1, 1823, states: "By the arrival at Nantucket of the Constitution and Daulphin, we receive the following account of the whalemen:

Nov. 25, 1822 — Frances, Swain, 1,600 bbls; Independence, Hammond, 1,800 bbls; Dec. 1—Wm. Rotch, Tobey, 200 bbls; Dec. 5——Stanton, Butrch, 600 bbls; Dec. 23—Alliance, Coffin, none; Jan. 30—Swift, 600 bbls; Feb. 13—Pindus, 200 bbls."

The report of Dec. 5 of the whaleship "Stanton, Capt. Burtch," was of interest to us, largely due to the names involved. The Stanton's were the family name associated with the founders of the town of Stonington, who settled permanently near Pawcatuck Rock, and the original pioneer, Thomas Stanton, owned large tracts of land on the south of the Pequot Trail, over Hinckley Hill and south to Osbrook Point. His trading house was located near the present residence of the late Charles Randall, whose daughter, Mrs. Morgan, occupies as her home, and possibly her mother, Mrs. Charles D. Randall.

Captain Burtch adds a twang of old Stonington to the entry.

Twenty years later the whale ship Charles Phelps' roster carried the name of Thomas Burtch, Jr., as second mate and his lay was 1-43, or one barrel of oil in each forty-three procured. The Phelps cruised to the Azores recruited and by easy stages proceeded down the Atlantic Ocean, around the Cap of Good Hope, into the Indian Ocean. Whaling as they cruised, capturing and rendering a number of leviathans, mostly right whales. The oil f rom the right whale was not as valuable as the product from the blunt nosed sperm. There was more bone from the right due to the baleen taken from the mouth.

Right whale oil was quoted at $11 per barrel and sperm at $20 per barrel, bone three pounds for $1.

Mr. Anthony frequently makes mention of the arrival or departure of the various vessels active at the period covered by notes in the diary.

"April 25, 1824. Sunday—This has been a busy day of unusual excitement, by the arrival from eleven o'clock in the morning till six in the evening of the following ships, all full of oil:

"The Martha, Reed, with 1900 barrels; the Good Return, Ferry, with 2,400 barrels; the Millwood, Burgess, with 1600 barrels. Making nearly 6,000 barrels of whale oil—also the ship Stanton, Capt. Burtch, from the Pacific with 2,000 barrels of sperm oil and the Commodore Decatur, Tilton, last from Mowhee, with 1400 barrels of sperm oil."

"April 26. Received letter by the Stanton, Burtch, from Pernambuco, mentioning that the Minerva had been heard from touching at Bahai and proceeding to Rio, where she arrived on the 23d of February last."

The Minerva, which Captain Burtch reported was a Rotch vessel and was a whaleman and cargo ship combined and is often mentioned.

The ship Stanton's cargo was a valuable invoice, mostly sperm oil. It would seem that there may have been some irregularity connected with the voyage or the conduct of the ship, to which the owners took exception for we find the entry as follows, some four weeks after the ship made port:

"May 19, 1824. The owners of the Stanton, dissatisfied with the conduct of Captain Burtch, brought in an account against him of $4,000. They agreed to leave it to a referee. The trial came on this day and it took the whole day. The decision of the referee not yet made known." It would be interesting to learn of the disposition of the case, but there is no reference to the conclusion of the referees, and the incident is closed.

• • • • •

Mr. Anthony's entry for, "First month, 26 day—An unpleasant day—Sunday—did not go out of the house." "27th. The great scarcity of money and disputes on Religioious matters are the great topics of conversation throughout the town."

It would seem that Joseph R. Anthony was interested in the Society of Friends, through his parents or by his marriage to Catherine Russell, daughter of Gilbert Russell, Anyway he consistently attended the services of the Society of Friends in the Spring Street house, later removed in 1826. He wrote of many stirring scenes taking place in this old meeting house. Involving the efforts of the society to bring the Russell girls to book.

It is a matter of tradition, that the Russell girls were famed for their beauty. An entry, April, 1823, Joseph records: "In the afternoon the Russell girls came down to the counting room to be weighed—Mary, 94 lbs; Sue, 90 lbs.; Katy, 88 lbs."

The Friends Society, of which the Russell girls were birthright members, undertook to discipline Mary and Susan Russell. Schism had developed among the Friends at this time. . . At the period the diary was written, the "New Light" movement, which had been brewing since 1817, was just culminating. The new group claimed to have received "new light" which led them to disregard the practices and principles of the society. In some communities the Quakers split and divided between the factions within the society, there were Guerneyites and Wilburites in some sections, representing degrees of liberality."—From introduction by Zephaniah W. Pease.

• • • • •

John Wilbur of Hopkinton, a member of the Society of Friends and active during the period when the society was divided and much disturbed within itself, was the leader of that branch which stood for the teachings of George Fox.

"So successful was he in opposing the heresies of Elias Hicks on one hand and the views of J. J. Gurney on the other, that many of the Hopkinton meeting adhered to him in the day of division that finally came and hence are commonly called Wilburites, in distinction from the majority who are designated as Gurneyites."—Frederick Denison.

• • • • •

The entries in Joseph R. Anthony's diaries written more than 100 years ago stir the interest of Westerly and Stonington readers, due to the items carrying names of people active in our communities and pursuing callings on the sea, and interested in the deliberations of a religious body whose membership was widespread in Washington County, R. I., and Connecticut.

It is interesting anyway. For "roast beef was a rarity at this season."—June 1, 1823.

There are 380,000,000 spinsters in the world, 6,000,000 in Great Britain, 8,000,000 in France, 11,000,000 in the United States and 16,000,000 in Germany.

THINK FISHERMEN DIED IN EACH OTHER'S ARMS

Police Believe One Victim of Heart Failure, Other of Shock.

1926 1926

New Bedford, Mass., Oct. 7.—(AP) Police held the theory tonight two veteran fishermen, whose bodies were found in their drifting 12-foot skiff, died in each other's arms—one of heart failure, the other from shock.

Dr. William Rosen, city medical examiner, reported Charles Manchester, 79, died of heart failure, but said he would not "close the case," until the body of Manchester's lifelong friend, Capt. Charles Shockley, was recovered.

Scallop fishermen found the two in their small boat yesterday, and in removing the bodies, that of Capt. Shockley, 78-year-old noted whaling skipper, slipped from their grasp into the sea.

Dragging operations have failed to reveal the body and a watch was kept along the New Bedford shore.

Dr. Rosen said there was no evidence of violence in the small skiff, but he declined to speculate on the cause of Capt. Shockley's death.

Police, however, in view of his report on Manchester, said they believed one of the men suffered a heart attack and the other, grief-stricken, died of a similar attack induced by shock.

A Riddle Maid by Mr. Isaac Rice

Before adam Eve or Cain had birth
My dwelling place was in the Earth
Soon my use was known to man
Yet without my help the search was vain
When I am new then I am old
My value often paid in gold
Sometimes ive feet Sometimes ive legs
Sometimes a body and no head
I never walk although I run
For many will use me old or young
He scruples not my skin to bark
And from my body take my hart
He will use me first with Courtesy care
Until he Conquer he is sure
Like human in statute I am seen
Sometimes a smiling at the queen
Although my presence she disdains
For her life on me depends
I have Carried more am more carries me
In varies forms my visage be
He tried my nature to destroy
Before my use he did employ
In mechanic art I have excelled
Yet many others have repelled
Although I cannot see or hear
I speake so loud that you may fear
Though deaf and dumb I first was made
I spoke by art or human aid
Kings and priest my nearest friends
Now I am zero a pagrants end
For Either I have no choice
When first I came by natures voice
Now if my name you wish to speak
I am in every house and every street
